considerably increasing the inspection reliability. It makes possible to perform express search of foreign inclusions and laminations and to get accurate results of measuring through polymeric (polyethylene), varnish and paint and other types of insulating coating.

A1210

Description. The Allegro A1210-A1214 Hall-effect latches are next generation replacements for the popular Allegro 317x and 318x lines of latching switches. The A121x family, produced with BiCMOS technology, consists of devices that feature fast power-on time and low-noise operation. Device programming is performed after packaging, to ensure increased switchpoint accuracy by eliminating offsets that can be induced by package stress.
