Animal instinct is powerful but the areas where man excels are his brain and his mind, although sometimes we wonder about this! We associate thought, reason, emotion, and creativity with these aptitudes. Along with this, man has manipulative dexterity. He uses his hands to essentially formulate and fabricate whatever he imagines.

Animal instincts come naturally to animals when they are born. The act of shaking water from fur is an instinctive behavior. The leatherback turtle, which must make its way to the ocean right after birth, also uses its instinct to get it

## Online Library Animal Instinct Answer Key

to its final destination. A baby kangaroo climbing into its mother's pouch after birth is instinctive behavior. Other examples of instinctive behavior include fight or flight responses and animal courtship behavior.

Animal Instinct With Their Feet Scientists say that elephants can pick up vibrations from earthquakes through their broad feet. Elephants' toenails are in the skin and not attached to the toes. Elephants' soles have sensitive foot pads that detect vibrations, such as those from an earthquake. That signals elephants to
