There are four steps in the creative process. 1.Preparation - collecting information about a problem 2.Incubation - unconscious recombination of ideas (requires conscious thinking about the problem) 3.Illumination - moment of inspiration 4.Verification - implementation/testing of the idea.

1 Introduction to Design and the Concept Development Process

Concept Development focuses on strategies the teacher uses to promote children's higher-order thinking skills and cognition. It is not rote teaching. Instead, it is the method a teacher uses to get children to think about the how and why of learning.

Real World Examples: Concept Development

When I first learned about CLASS Group Coaching—a training for early childhood professionals about building relationships with children—I was more than a little interested. This, I thought.This is what teaching is all about. It seems to be an obvious concept, but once we dig deeper, we are able to identify the whys and hows of our interactions.
