Emtala Ob Medical Screening Exam

What are the provisions of EMTALA? Hospitals have three main obligations under EMTALA: Any individual who comes and requests must receive a medical screening examination to determine whether an emergency medical condition exists. Examination and treatment cannot be delayed to inquire about methods of payment or insurance coverage.

ACEP // EMTALA Fact Sheet

Screening Requirements. The screening requirement in EMTALA reads as follows: In the case of a hospital that has a hospital emergency department, if any individual (whether or not eligible for benefits under this sub-chapter) comes to the emergency department and a request is made on the individual's behalf for examination or treatment for a medical condition, the hospital must provide for an appropriate medical screening examination within the capability of the hospital's emergency ...

The EMTALA has other flaws. It requires that the hospital perform a medical screening examination to determine if the patient has an emergency condition. 2 But what if the patient doesn't have an emergency but needs care for a chronic disease, such as diabetes, hypertension, or asthma, and is uninsured? Currently, there is no EMTALA ...

EMTALA—A Noble Policy That Needs Improvement | Asthma ...

Answer: According to EMTALA (Emergency Medical Treatment & Labor Act) regulations.... "A hospital must formally determine who is qualified to perform the initial medical screening examination, i.e., qualified medical person. While it is permissible for a hospital to designate a non-physician practitioner as the qualified medical person, the designated non-physician practitioners must be set forth in a document that is approved by the governing body of the hospital.

FAQ: Who can conduct a Medical Screening Examination?

The rule is a recent expansion of EMTALA regulations to cover areas surrounding the hospital and off-site locations, according to Frew. "The rule says that the patient has presented to the hospital if they come to the hospital seeking care, or fall victim to a medical event or accident on hospital-controlled property within a 250-yard zone ...

Seven (18%) of these settlements involved a pregnant minor. Most OB cases involved failure to provide screening exam (82%) and/or stabilizing treatment (51%). Failure to arrange appropriate transfer was more common for OB (36%) compared with non-OB settlements (21%) ($p = 0.041$).

Penalties for Emergency Medical Treatment and Labor Act ...

OB patients were the primary reason for EMTALA. A huge percentage of EMTALA citations have been issued for OB situations. Of the non-transfer citations, most have to do with not receiving a timely evaluation by the OB and typically involve a failure to appreciate the EMTALA obligation to OB patients.
