Exploration IntroductionEarth is made up of complex, interactive systems that create a constantly changing world that we are striving to understand. From the vantage point of space, we are able to observe our planet globally, using sensitive instruments to understand the delicate balance among its oceans, air, land and life.

Exploration | Earth - NASA Solar System Exploration

Overview In this lab activity, students will become materials scientists for a day. Working with NASA to design a satellite or a rover means understanding the properties of metals under conditions very unlike those on Earth. Which material should we use to construct a rover going to a planet like Venus?
