members of the family Alligatoridae and order Crocodylia. It is a carnivorous reptile that lives along slow-moving rivers, lakes, seasonally flooded savannas of the Amazon basin, and in other freshwater habitats of South America. It is a large species, growing to at least 5 m and possibly up to 6 m in length, which makes it the fourth-largest reptile in the Neotropical realm, b

Black caiman - Wikipedia

N.B. Exceptionally large specimens can be found in all species of crocodylian. The black caiman is the largest member of the alligator family, and the largest predator in the Amazon River basin, with adult males averaging 4–5 metres (13.1–16.4 feet) in length. The species gets its name from its dark, black skin colouration, which provides camouflage during nocturnal hunts, and is thought to help absorb more heat.
