The breaking wheel or execution wheel, also known as the Catherine wheel or simply the Wheel, was a torture method used for public execution primarily in Europe from antiquity through Middle Ages into the early modern period by breaking the bones of a criminal, and/or bludgeoning them to death.

Breaking wheel - Wikipedia

The oldest wheel found in archeological excavations was discovered in what was Mesopotamia and is believed to be over 5,500 years old. It was not used for transportation, though, but rather as a potter's wheel. The combination of the wheel and axle made possible early forms of transportation, which became more sophisticated over time with the development of other technologies.

How to fix the wheel on my mouse if it's not working

Back in 2011, the FIA even implemented double wheel tethers for twice the safety, and in 2018, a third. There's just one big problem: they don't actually seem to be reliably working.

Formula One's Wheel Tethers Don't Seem To Be Working

1)Start by unplugging your mouse from the computer; 2)Follow it up by turning the mouse upside down as shown in the image below; 3)You are now required to rub the scroll wheel repeatedly for a minute or so in every possible direction. This can be done with the help of a dry, fresh, and clean piece of linen.
